# Introduction

Newton Electrical is an innovative Electrical and Service Management System made to simplify tasks for clients, service teams, and administrative staff. This user-friendly web-based application ensures smooth interactions for all users. For clients, the system offers easy registration and access to a comprehensive range of services, including scheduling wiring, A/C repairs, security camera installations, and more. Our skilled service teams conduct home visits for scheduled repairs and installations, ensuring prompt and professional service delivery. Clients can also opt for annual service packages, wherein our team performs services as per the agreed terms, providing convenience and peace of mind. To showcase our past projects and demonstrate client satisfaction, we provide a dedicated section where clients can explore testimonials and feedback from previous service engagements. This transparency builds trust and confidence in our services, fostering long-term relationships with our clients.

A special feature of our system is the career section, where job seekers can browse available positions, apply for jobs directly on-site, and track the status of their applications in real-time. This interactive platform promotes transparency and accessibility in our recruitment process, attracting top talent to join our team. In addition to service offerings, clients can securely purchase electronic items through our integrated online store, which offers a wide selection of products and flexible payment options. This seamless shopping experience enhances convenience for clients, further solidifying our position as a one-stop solution for all their electrical needs.

On the administrative side, our staff can log in to perform various tasks. Admins can review and approve service requests, manage user accounts, and handle online transactions through an interactive dashboard. Advanced Analytics tools help understand user behavior, service trends, and popular products, making decision-making easier.

### Epic - User Management

Feature	User Story ID	User Story	Tasks
Login to the system	100	“As a user, I want a login system so that I can schedule service booking.”	1.Allow the user to enter user email and password.
		“As a registered user, I want to log into my account,So that I can access my profile.”	2.Validate user email and Password
		“As a user manager, I want to log into system, So that I can manage users and their permissions.”	3. Create user cookies and sessions to users login 3.Redirect to relevant dashboard
Register to the system	101	“As a customer, I want to register as a user so I can schedule service using web site.”	1.Create page with registration form and relevant data fields
		“As a system admin, I want to register to the system as an admin, So that I can manage users.”	2.Collect data from user
		“As a employee, I want to register to the system as an employee, So that i can manage and update my employee profile and status.”	3.Store user data in database
Resetting password	102	“As a user, I want to reset my password so I can secure my profile and account.”	1. Create page to show user data 2. Retrieve user to from database

			3. Update new password and store in database
<b>View User Profile</b>	103	“As a registered user, I want to view my profile, So that I can view my profile and see my details”	1. Create page to display user data 2. Retrieve user data from the database
<b>Update User Profile</b>	104	“As a registered user, I want to edit my user account, So that I can Change my details when necessary.”	1.Create form to update user data. 2.Get old user data from the database 3.Updates old data to new data in the database
<b>Delete User Profile</b>	105	“As a registered user, I want to delete my account, So that I can delete my account whenever necessary”	1. Create feature to delete user data 2.Delete all data of relevant user from database
<b>Logout</b>	106	“As a user, I want to logout from the system so that I can secure the account.”	1. Create a logout page. 2. Create logout confirm page 3. Delete cookie and session when logout
<b>Display all registered users</b>	107	“As a user manager, I want to get list of registered users, So that I can manage and see registered users.”	1. Get all data of registered users from database 2.Show all users in admin dashboard
<b>Search Users</b>	108	“As a user manager, I want to search users, So that I can select users if necessary.”	1.Implement search bar to get input from user manager 2.Select user according to input provided 3.Retrieve user from the database

<b>Remove User</b>	109	“As a user manager, I want to delete users, So that I can remove users from the system.”	1.Implement button to remove user. 2.Delete user data of user from database
<b>Generate User Report</b>	110	“As a user manager, I want to get report of users, So that I can get ideas about registered users for better decision making purposes.”	1.Get all user details from database 2. Generate report using those 3.Implement option to download the report
<b>Reward Point calculation</b>	111	“As a user, I want reward point section, So that i can get benefits according to reward points that i have earned”	1. Implement reward point section 2.Update the reward points in database 3. Retrieve available reward points total from the database

		<p>“As an Employee, I want to be able to view assigned tasks and deadlines within ongoing projects, So that I can prioritize my work and ensure timely completion of projects deliverables.”</p>	
		<p>“As an Employee, I want to collaborate with team members by sharing project updates, exchanging information and discussing project-related issues, So that I can contribute effectively to project progress and foster teamwork within the organization.”</p> <p>“As a Customer, I want to be able to submit project requests or inquiries regarding electrical installations or upgrades, So that I can communicate my requirements and expectations to the project management team.”</p> <p>“As a Customer, I want to receive updates and notifications on the progress of my project, including milestones achieved and upcoming tasks, So that I can stay informed and track the status of my project without needing to follow up constantly.”</p>	
<b>Update Projects</b>	805	<p>“As a Project Manager, I want to update details of the projects, So after completing the project can be added to the relevant section.”</p>	<p>1. Must refer to ‘add project page.’</p>

			<ol style="list-style-type: none"> <li>2. 'Project status' column can be updated.</li> <li>3. Implement the function to update projects for a "update" button.</li> <li>4. Insert data into relevant tables in a database.</li> </ol>
<b>Delete Projects</b>	806	<p>"As a Project Manager, I want to delete projects, So I can maintain the system very well."</p>	<ol style="list-style-type: none"> <li>1. Must refer to 'add project page.'</li> <li>2. Implement the function to delete projects for a "delete" button.</li> <li>3. Then irrelevant projects can be deleted.</li> </ol>
<b>Generate Reports</b>	807	<p>"As a Project Manager, I want to generate comprehensive reports on project status, resource utilization and budget allocation, So that I can assess project performance, identify potential bottlenecks and make informed decisions to optimize project outcomes."</p>	<ol style="list-style-type: none"> <li>1. Represent the details of projects.</li> <li>2. Provide an option to filter details and represent them in charts.</li> <li>3. Add an option to download the reports.</li> </ol>

## Product Backlog

- 1 . Highest Priority
- 2 . Normal Priority
- 3 . Less Priority

Order ID	User Story ID	User Story	Estimated Hours	Priority	Status
1	100	“As a customer, I want to register as a user so I can schedule service using a web site. As a system admin, I want to register to the system as an admin, So that I can manage users through a dashboard.”	04	1	To be started
3	101	“As a user, I want to reset my password so I can secure my profile and account.”	02	1	To be started
10	104	“As a registered user, I want to edit my user account, So that I can Change my details when necessary.”	01	1	To be started
12	107	“As a user manager, I want to get list of registered users, So that I can manage and see registered users.”	03	2	To be started
34	108	“As a user manager, I want to search users, So that I can select users if necessary.”	02	1	To be started

22	110	"As a user manager, I want to get report of users, So that I can get ideas about registered users for better decision making purposes."	0	1	To be stated
41	111	"As a user, I want reward point section, So that i can get benefits according to reward points that i have earned"	03	3	To be started
	505	"As a customer, I want the system to offer diverse alteration options, so that I can tailor services to my liking."	04	2	To be started
	506	"As a user, I want to quickly and easily reschedule appointments within the system, so that I can adapt my schedule effortlessly,"	02	1	To be started
	507	"As a user, I want the capability to cancel appointments, so that I can have a straightforward process for a hassle-free cancellation experience."	02	1	To be started
	508	"As a user, I want to receive email notifications upon the approval of my appointments so that I can stay informed about the status of scheduled events."	01	2	To be started

	509	“As a Schedule Manager, I need to efficiently review appointment details to decide whether to accept or reject them, so that I can optimize scheduling”	02	1	To be started
	510	"As a Schedule Manager, I need to efficiently review cancel request details, so that I can optimize scheduling”	02	1	To be started
50	614	“As a package manager, I want to be able to edit the details of a package in the system, So that I can update its information as needed.”	05	1	To be started
51	615	“As a Package Manager, I want to be able to add new packages to the system,So that I can attract more Customers ”	05	1	To be started
52	616	“As a Package Manager, I want to be able to delete the packages from the system, So that I can remove packages according to the season”	02	1	To be started
53	617	“As a Customer, I want the ability to easily access and view the list of all packages, So that I can select a suitable package"	01	2	To be started

54	618	“As a Customer, I want the ability to easily access and view the details of all packages, So that I can learn more about its features and benefits ”	01	1	To be started
55	619	“As a Customer, I want the ability to easily select subscription plans monthly or annually, So that I can choose the plan that best fits my needs and budget. ”	01	1	To be started
56	620	“As a Customer, I want the ability to add selected packages to the cart"	01	1	To be started
57	620	“As a Customer, I want the ability to make payment for selected packages to the cart"	01	1	To be started
58	621	“As a package manager, I want to be able to generate the report of newly added packages, deleted packages, updated packages, So that I can effectively communicate changes to users, maintainers, and stakeholders.”	2.5	2	To be started
		“As a new employee, I want to be able to register in the career management system, so I can access the platform. ”		1	To be started

		“As a registered user, I want to create a comprehensive profile, so my skills and experiences are accurately represented.”		1	To be started
	201	“As a new employee, I want to be able to register in the career management system, so I can access the platform.”	3	2	To be started
	202	“As a registered user, I want to create a comprehensive profile, so my skills and experiences are accurately represented.”	4	2	To be started
	203	“As an HR manager,I want login to the System,So that Add the current job opportunities to the page ”	3	2	To be started
	204	“As an employee, I want to view current job opportunities, so I can explore potential career advancements within Newton Electricals.”	4	1	To be started
	205	“As an HR manager, I want to post job openings, so they are visible to all employees.”	3	1	To be started
	206	“As an employee, I want to search for jobs based on specific criteria (e.g., department, location), so I	3	1	To be started

		can find relevant opportunities efficiently.”			
	207	“As a HR manager, I want to access employee resumes, so I can evaluate potential candidates for electrical services.”	3	1	To be started
	208	“As a HR manager, I want to communicate with clients and applicants seamlessly through the system, so I can schedule interviews and discuss job opportunities”	3	2	To be started
	209	“As an employee, I want to receive notifications on important events (e.g., new job applications, service request updates), so I can stay informed and responsive.”	4	3	To be started
	210	“As an HR manager, I want to track task completion within the system, so I can assess employee performance and generate reports.”	3	1	To be started
60	803	“As a Project Manager, I want to expected details of completed and in-progress projects are to be entered into the system, So, that I can the customers as well as the employees of the company can give an idea about the projects of the company.”	4	1	To be started

61	804	“As a Project Manager, I want to view projects of the company, So I can get an idea about the current status of projects.”	4	1	To be started
		“As an Employee, I want to be able to view assigned tasks and deadlines within ongoing projects, So that I can prioritize my work and ensure timely completion of projects deliverables.”	4	1	To be started
		“As an Employee, I want to collaborate with team members by sharing project updates, exchanging information and discussing project-related issues, So that I can contribute effectively to project progress and foster teamwork within the organization.”	4	1	To be started
		“As a Customer, I want to be able to submit project requests or inquiries regarding electrical installations or upgrades, So that I can communicate my requirements and expectations to the project management team.”	4	1	To be started

		<p>“As a Customer, I want to receive updates and notifications on the progress of my project, including milestones achieved and upcoming tasks, So that I can stay informed and track the status of my project without needing to follow up constantly.</p>	4	1	To be started
62	805	<p>“As a Project Manager, I want to update details of the projects, So after completing the project can be added to the relevant section.”</p>	2	1	To be started
63	806	<p>“As a Project Manager, I want to delete projects, So I can maintain the system very well.”</p>	2	1	To be started
64	807	<p>“ As a Project Manager, I want to generate comprehensive reports on project status, resource utilization and budget allocation, So that I can assess project performance, identify potential bottlenecks and make informed decisions to optimize project outcomes.”</p>	4	1	To be started

	411	<p>“As an Inventory Manager, I want a login system so that I can access inventory data and manage stock levels effectively.”</p>			To be started
		<p>“As an inventory Manager, I want a login system so that I can oversee inventory levels, track orders, and manage product data efficiently.”</p>			To be started
		<p>“As an Inventory Manager, I want a login system so that I can communicate with suppliers, track orders, and manage supplier relationships effectively.”</p>			To be started

	412	<p>“As an Inventory Manager, I want the ability to reset my password easily in case I forget it, ensuring the security of my profile.”</p>			To be started
		<p>“As an Inventory Manager, I want a straightforward password recovery process to regain access to my account in case of a forgotten password.”</p>			To be started
		<p>“As an Inventory Manager, I want a secure password recovery process that safeguards my account against unauthorized access.”</p>			To be started

	413	<p>“As an Inventory Manager, I want to log out from the system, ensuring the safety of data and enhancing security.”</p>			To be started
		<p>“As an Inventory Manager, I want a reliable logout mechanism in the system to ensure the security of sensitive data and prevent unauthorized access.”</p>			To be started
		<p>“As an Inventory Manager, I want a seamless logout functionality in the system to easily terminate my session and safeguard sensitive information.”</p>			To be started

	414	<p>“As an Inventory Manager, I want to efficiently generate orders for replenishing stock to ensure optimal inventory levels and meet customer demand.”</p>			To be started
	415	<p>“As an Inventory Manager, I want to efficiently check the status of orders placed, ensuring transparency and enabling effective management of incoming stock.”</p>			To be started
	416	<p>“As an Inventory Manager, I want to efficiently generate comprehensive reports to gain insights into stock levels, order trends, and overall inventory performance. This enables informed decision-making and effective management of the inventory.”</p>			To be started

		<p>“As an Inventory Manager, I want to be able to receive orders from the supplier manager so that I can review and take appropriate action, such as accepting or rejecting orders.”</p>			To be started

## IT22322876 - Madhubhashana M D H P

### Epic - Order Management

Feature	User Story ID	User Story	Tasks
Ordering of Products	600	“As a customer, I want to order an item directly from the description page, so that I can order top selling products faster.”	1. Design appropriate UI components so customers can select item specifics such as quantity or color.
		“As a customer, I want the option to checkout all items from cart, so that I can save time without needing to place an order for each product separately.”	2. Implement stock availability validations before order initiation
		“As a customer, I may want to change or cancel my order before it’s shipped or accepted, so that I can hold some control over my payments.”	3. Implement checkout all option for shopping cart and cancel button for order details view

			4. Test all order placing functionalities
<b>Managing the shopping cart</b>	601	“As a customer, I want to be able to add items to the cart, so that I can continue browsing more products without the need to order directly.”	1. Design shopping cart UI (mobile responsive). 2. Implement cart API with full functionality. 3. Add sample products and test cart functionality
		“As a customer, I need to modify the items added to the shopping cart, so that I don’t have to visit product description pages every time.”	
		“As a customer, I want the option to clear all items in the cart, so that I can stay clear of payment reminders for the products I don’t really want to order.”	
<b>Viewing order history</b>	602	"As a customer, I need to be able to view a comprehensive and a categorized list of all my past orders so that I can refer to it later to access all order related features such as reordering, tracking, complaining etc."	1. Design a well categorized ‘My Orders’ interface 2. Develop order history viewing functionality 3. Create databases for storing order data 4. Place sample orders and test order history interface
		“As an Order Manager, I want to view and access orders placed by all customers, so that I can stay updated on the latest order volume which helps me in my report generations.”	
<b>Tracking placed Orders</b>	603	“As a customer, I want to track my order directly from the order details page, so that I don’t have to visit external tracking sites or to contact carrier companies myself for that purpose.”	1. Design a comprehensive order tracking interface 2. Develop necessary functions, import external API if required

			<p>3. Connect with external tracking databases when possible</p> <p>4. Test the in-site order tracking features</p>
<b>Dispute Raising for Orders</b>	604	"As a customer, I want to be able to raise disputes, initiate returns or exchanges for items that I am not satisfied with so that I can explain the situation and make things right between me and the supplier."	<p>1.Design interface to raise disputes for orders</p> <p>2. Implement dispute handling functions with innovative features</p>
		"As a customer, I want to track progress of my ongoing disputes, so that I can stay updated and stay ahead of uncertainties."	<p>3. Raise a sample dispute and test progress display, solutions and other related components</p>
<b>Making Payments</b>	605	"As a customer, I need to make payments for my orders, so that I can complete my purchases."	<p>1. Design a user friendly payment handling interface</p>
		"As a customer, I want a secure platform to do my payments, so that I can enjoy a prompt and seamless online purchase experience."	<p>2. Do secure development of core payment API, Handle user input functions in a secure manner, Integrate with external payment processors when possible</p>
		"As a customer, I want to pay for my orders using my preferred payment method, so that I don't have to adapt to each and every payment platform."	<p>3. Store customers' sensitive data in secure and encrypted databases</p> <p>4. Integrate with a demo payment gateway and test payment functionality.</p>

		<p>“As a customer, I want to be able to make online payments for my scheduled services and service packages, so that I don’t have to go through traditional payment methods.”</p>	
<b>Getting Notifications</b>	606	<p>“As a customer, I need to get notified about everything from the point of placing the order to the delivery, so that I can experience a trustworthy platform which I’d like to recommend to others.”</p>	<ol style="list-style-type: none"> <li>1. Design an easy to access notifications side panel which allows to view all notifications for a certain period when requested</li> <li>2. Implement notifications functionality, Integrate with mobile careers and email automation services for better feature set</li> <li>3. Store all notifications in a database for a limited time</li> <li>4. Test notifications sending and receiving functionalities</li> </ol>
		<p>“As a customer, I need to get notifications via my preferred method such as email or mobile phone, so that I don’t have to manually check the site every time.”</p>	
		<p>"As an Order Manager, I want the system to notify me if something goes wrong during an order, such as a faulty or a suspicious order so that I can review such orders and take necessary actions."</p>	
		<p>"As an Order Manager, I want to get notified if a dispute raised by a customer is not solved for a certain time so that I can step in to solve the problem which aids in customer satisfaction."</p>	

<b>Moderate Order Activities</b>	607	<p>“As an Order Manager, I want to be able to take necessary actions such as limiting order related activities for a particular customer, if I find their activities as an abuse of the system, so that I can help make the marketplace safe for everyone.”</p>	<ol style="list-style-type: none"> <li>1. Design a comprehensive order management dashboard with advanced filtering techniques.</li> <li>2. Implement order moderation functions</li> <li>3. Place orders and test order moderation functions</li> </ol>
<b>Dispute Resolving</b>	608	<p>“As an Order Manager, I want to be able to step in to resolve unresolved disputes raised by customers, so that I can contribute to a better after-sales service and customer satisfaction.”</p>	<ol style="list-style-type: none"> <li>1. Design dispute resolving interface with progress tracking</li> <li>2. Allow to get user feedback after their after-sales experience</li> <li>3. Develop dispute solving functionality, provide access to order manager</li> <li>4. Test dispute resolving functionalities</li> </ol>
<b>Generate Order Reports</b>	609	<p>"As an Order Manager, I want to generate reports on key order metrics such as monthly order volume, best selling products, fulfillment time and return rates so that I can track performance and identify areas that needs improvement."</p>	<ol style="list-style-type: none"> <li>1. Design report generation interface</li> <li>2. Allow order managers to enter key metrics and select data</li> <li>3. Implement report generation and calculation functionalities</li> <li>4. Generate reports and test reporting functionality</li> </ol>

<b>Suggest new Features</b>	610	“As a Customer, I need to be able to suggest new features I prefer regarding the current order management system, so that I can contribute to make it better for all other customers.”	1. Design a feature request form for order management  2. Implement input functionality and form handling  3. Test feature suggestion functionality by submitting sample feature requests
		"As an Order Manager, I want the option to suggest new features for the order management system based on feedback from customers, colleagues, and stakeholders, so that I can contribute to enhance overall efficiency and effectiveness of the whole system."	

## 1st Sprint

In this, we have mentioned the tasks for our first sprint.

Priority	Product Backlog Item	Tasks	User Story ID	Estimated Hours	Owner
	Register to the system	Create user registration form	101	3	IT22028464
		Implementing user validation process	101	1	
		Collect user data and store it in the database	101	1	

	View user profile	Implementing user profile interface	102	4	
		Implementing separate password reset section within user profile	102	3	
		Create page to edit user details	102	2	
	Reset the password	Implement password reset page	104	2	
		Develop notification functionality to receive password reset confirmation	104	4	
		Update changes in the database	104	2	
	Edit user profile	Create form to update user data	105	3	
		Implement update functionality to retrieve and update user details to new details	105	4	
		Update user data in the database	105	4	
2	<b>Signing up Users and Creating Profiles</b>	Set up a user registration form.	201	3	IT22059604
		Implement authentication process.	201	4	
		Design profile creation interface.	201	3	

2	<b>Job Listing and Search Functionality</b>	Implement profile fields.	201	4	
		Design job listing interface	202	4	
		Implement job listing retrieval.	202	5	
		Display job descriptions accurately.	202	3	
		Implement HR manager login functionality.	203	4	
1	<b>Add Projects</b>	Create the 'add project page'.	803	1	IT 22581716
		Create an 'add project form.'	803	0.5	

		Implement the function to save projects for a “save” button.	803	0.5	
		Insert data into relevant tables in a database.	803	2	
1	<b>View Projects</b>	Create a ‘project page’.	804	2	
		Create a ‘project database’.	804	1.5	
		Implement the function to display projects separately as 'Completed Projects' and 'Ongoing Projects'."	804	0.5	

1	<b>Update Projects</b>	Must refer to ‘add project page.’	805	0.5	
		‘Project status’ column can be updated.	805	0.5	
		Implement the function to update projects for an “update” button.	805	0.5	
		Insert data into relevant tables in a database.	805	0.5	
	<b>Schedule appointment</b>	Create a appointment booking UI	505	03	IT22575944
		Create a selection of services	505	02	
		Determine relevant service alteration	505	0.5	
		Create a space for users to write appointment details	505	0.5	
		Create a UI for users to add pictures of the service needed	505	01	
		Create a form to get service location	505	01	
		Create a available time slot and dates	505	0.5	

		Create a confirm button to confirm the appointment request	505	0.25	
	<b>Reschedule appointments</b>	Create a interface display booking details	506	02	
		Add Reschedule option	506	0.5	
		Create interface that display available time slots and dates	506	0.5	
		Create confirm booking button	506	0.25	
	<b>Cancel appointments</b>	Create a interface display bookings	507	02	
		Add cancel option	507	01	
		create a space for customers to enter cancel reasoning	507	0.5	
		create a cancel confirmation button	507	0.25	
		contact the user about reject cancel reasonings	507	0.5	
	<b>Appointment confirmation</b>	.Create a method to send confirmation emails	508	01	
	<b>Edit Packages</b>	1. Create the “Edit” button in each Package section.	614	0.5	IT22578396
		2. Create a form for package details update.	614	02	
		3. Create a Submit button to Save details.	614	0.5	
		4. Implement a function to update details.	614	01	
		5.Create relevant database	614	01	
1	<b>Add Packages</b>	1. Create a separate page for each package.	615	01	
		2. Create a button for adding new packages.	615	0.5	
		3. Implement a function for adding new packages.	615	01	

		4. Create a form for adding the details of the new package.	615	01	
		5. Create a button to submit a new package.	615	0.5	
		7. Create a relevant database.	615	01	
1	<b>Delete packages</b>	1. Create a “Delete” button for each package.	616	0.5	
		2. Create a confirmation notification for package deletion.	616	0.5	
		3. Implement a function for deleting a package from the system.	616	01	
	<b>Generate report</b>	1. Create a button for generate the report.	621	0.5	
		2. Implement a function for generate the report.	621	01	
		3. Create a button for view the report.	621	0.5	
		4. Provide a button to download the report.	621	0.5	
	<b>Create feedback</b>	Create the feedback form..  Determine relevant questions for the feedback form.  Launch the feedback form to collect feedback.			IT22898098
	<b>Update feedback</b>	Customer can update their responses by revisiting the feedback			
	<b>Delete feedback</b>	Customers can request to delete their responses by contacting the			

		<p>administrator or support team directly.</p> <p>Administrators can access the backend of the feedback system to delete specific responses upon user request.</p>			
	<b>View feedback</b>	<p>Create feedback view page</p> <p>Retrieve feedbacks from the database</p>			
	<b>Login to the system</b>	1.Create a Login Page.	411		IT22345578
		2.Create a Login Form.	411		
		3.Validate Login Credentials.	411		
		4.Redirect the User to the Relevant Web Page.	411		
	<b>Reset the password</b>	1.Create a "Forgot Password?" Button.	412		
		2.Develop a Password Reset Page.	412		
		3.Implement Input Fields for New Passwords.	412		

		4.Update Changes in the Database			
	<b>Log out from the system</b>	1.Create a Logout Page.	413		
		2.Create a Logout Confirmation Page.	413		
		3.Implement Logout Functionality.	413		
		4.Redirect to Home/Login Page.	413		
	<b>Generate orders</b>	1.Represent the Details of Orders.	414		
		2.Implement a Function to Generate the Report.	414		
		3.Provide a Function to Display the Report.	414		
		4.Add an Option to Download the Reports.	414		
	<b>Check the order status</b>	Make a separate interface to view the order status.	415		
	<b>Generate reports</b>	1.Represent the Details of Orders.	416		
		2.Implement a Function to Generate the Report.	416		

		3.Provide a Function to Display the Report.	416		
		4.Add an Option to Download the Reports.	416		
	<b>Accept or reject orders</b>	1.Display Orders in a Separate Interface.	417		
		2.Provide Options to Accept or Reject Orders	417		
2	<b>Placing orders, change or cancel orders</b>	Implement order placing functionality	600	5	<b>IT22322876</b>
		Implement order change and cancel features	600	4	
	<b>Shopping Cart Functionality</b>	Design shopping cart interface	601	3	
		Implement CRUD functionality	601	5	
		Design 'My Orders' page	602	5	
			602	6	

2	<b>Order History Functionality</b>	Implement order history functions			<b>IT22322876</b>
		Test functionality	602	2	
	<b>Tracking Orders</b>	Design main interface	603	5	
		Integrate with external tracking providers	603	2	
		Implementation and Testing phases	603	3	
	<b>Dispute Raising Functionality</b>	Designing interface for raising disputes	604	3	
		Implementation	604	5	
		Testing functionality	604	2	
	<b>Payment Handling</b>	Interface designing	605	3	
		Integration with payment processors	605	1	
		Secure development	605	6	
		Testing functionality	605	2	
	<b>Order related Notifications System</b>	Notifications UI design	606	3	
		Implementation	606	5	
		Integrate with email providers	606	0.5	
			606	0.5	

		Integrate with mobile careers			
--	--	-------------------------------	--	--	--

## 2nd Sprint

In this, we have mentioned the tasks for our second sprint.

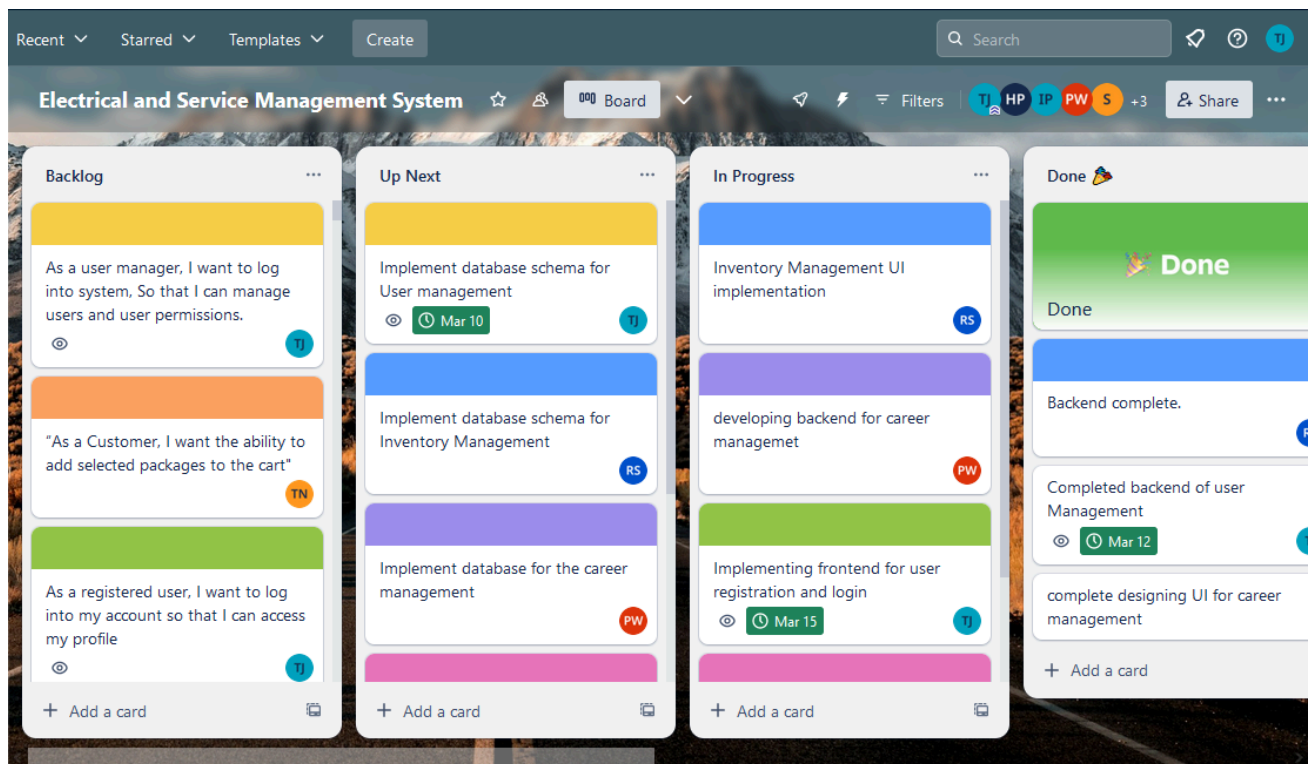

Priority	Product Backlog Item	Tasks	User Story ID	Estimated Hours	Owner
	<b>Assign User roles</b>	Implement functionality to update user roles	110	4	IT22028464
		Create a table to view user information	110	2	
	<b>Reward points calculation functionality</b>	Implement page to display earned reward points	111	4	
		Implement method to claim earned rewards	111	4	
	<b>Generate User reports</b>	Generate a detailed user report on users	112	4	
		Implement functionality to download the report	112	3	
1	<b>Job Listing and Search Functionality Job Search</b>	Design search interface	204	4	IT22059604
		Implement search functionality.	204	5	
		Test search functionality.	204	3	
2	<b>Tools of Communication Integrated</b>	Integrate phone feature.	208	3	
		Integrate email feature		3	

			208		
2	<b>Notifications and Alerting Systems</b>	Design notification system.	209	3	
		Implement notification triggers.	209	4	
2	<b>Obtaining Resumes Resume Access for Clients</b>	Design resume access interface.	207	2	
		Implement resume viewing functionality	207	3	
		Ensure client authentication.	207	2	
1	<b>Task Completion and Reporting Task Tracking</b>	Develop task tracking interface	210	3	
		Implement task completion checkboxes.		4	
		Test task tracking functionality.		2	
1	<b>Delete Projects</b>	Must refer to ‘add project page.’	806	0.5	IT225817 16
		Implement the function to delete projects for a “delete” button.	806	1	
		Then irrelevant projects can be deleted.	806	0.5	
1	<b>Generate Reports</b>	Represent the details of projects.	807	2	
		Provide an option to filter details and represent them in charts.	807	1.5	

		Add an option to download the reports.	807	0.5	
1	<b>View and reject/accept appointments</b>	Create admin interface	509	01	IT225759 44
		Create a appointment request list	509	01	
		display appointment details	509	0.5	
		Add a approve or reject button	509	0.5	
1	<b>Accept/reject cancellation request</b>	Create admin interface	510	02	
		Create a cancelation request list	510	01	
		display request details	510	01	
		Add a approve or reject button	510	0.5	
2	<b>Generate report</b>	Represent the details of chancellings.	511	02	
		Provide an option to filter details and represent them in charts..	511	01	
2	<b>View Package list</b>	Create a page that display available packages	617	1	IT225783 96
